

PROFILE

I am a Software Developer that had a varied career in fields such as education, communications, PR, art and psychotherapy. I bring a diverse skill-set to my work with much to offer teams and clients. I have a love of human-centred design and have been expanding my knowledge in information security, recently gaining a Certificate in Information Security Management Principles.

SKILLS

HTML5
CSS3
C#
.NET
JAVASCRIPT
NODE JS
MONGODB
EXPRESS JS

REACT
NEXT.JS
TYPESCRIPT
PYTHON
SQL
DOCKER
AWS

PROJECTS

TESTSWITCH

ONLINE AUTOMATED CODING TEST APP

An app created to screen software developer candidates. Creates secure invites for candidates, a secure online testing environment with Monaco text editor, specialised settings for highlighting and autocomplete, and secure administrator access to candidate submissions with automated results.

MARS MISSION

OPEN API MOBILE-FIRST WEBSITE

Utilises open APIs from NASA to create a Mars Rover themed educational website to engage children in the 11-16 age range. The website is designed to be mobile-first.

MYFACE-MVC

PROGRESSIVELY ENHANCED APP

ASP.NET MVC social networking App with post and user creation. Progressively enhanced to work in a majority of browsers and screen sizes. JS not required.

REALUP

REACT-BASED MOBILE/DESKTOP APP

First place winner in Moms Can CodeHackathon 2018. An imposter syndrome therapy app. This hybrid app was created with React and compiled with Cordova for Android use.
